

Training Video Inventory

Updated 02/11

TO OUR CUSTOMERS

IMPORTANT:

Penn Millers training video library is available for our customer's use. We hope you will find the videos to be helpful in your efforts to improve conditions and safety practices. The titles and formats available (VHS or DVD) are listed on the following pages. In order to allow all of our customers the full use of the library, please follow the instructions listed below when placing a request. Thank you for your cooperation.

- 1) Contact your Loss Control Representative to place an order.**
- 2) Please limit the request to three (3) videos per order.**
- 3) Please order with the intention of returning the videos in good condition to Penn Millers within thirty (30) days.**
- 4) Additional video requests can only be fulfilled once any outstanding videos have been returned.**

Auto:

A-1 VHS

Getting On/Off Tractors, Trailers and Docks - 18:00 (J.J. Keller)

This video discusses the proper mount/dismount techniques to help prevent injuries and down time.

This video covers:

- Safe hand holds
- Proper foot positioning

A-6 VHS

Speed & Space Management – 15:00

A-7 VHS

Keller's Extreme - Rollover – 7:00

A-8 VHS

Vehicle Inspection – 16:00

A-9 VHS

Trucking - Accidents & Breakdowns (J.J. Keller)

A-10 VHS

Truck Driving – Controlling Skids – 17:09

A-11 VHS

Night Driving – 7:00

A-13 VHS

Back Safety for Truck Drivers – 40:00

A-14 VHS

Driver Fatigue – 22:00

A-15 VHS

Parking Safely – 14:00

Designed to refresh even experienced drivers' parking skills, including:

- Basic road skills
- Scanning for hazards
- Sharing the road with pedestrians
- Covering the brake

A-17 VHS

Seeing Hazards – 7:00

A-18 VHS

City Driving Tactics – 19:26

General Safety:

GS-1 VHS

Back Care and Safety -17:00

Employees need to see what it means to protect their backs. Includes detailed instructions on:

- How to prevent back injury
- How the back works
- Excess weight, hurrying, inattention
- Posture: standing, sitting, driving, sleeping
- Proper lifting techniques, basic back exercises

GS-2 VHS

Fire Evacuation –In the Workplace -17:32

Ensure employees know what to do in case of a major fire. This video provides details about Planning for, surviving a workplace fire.

Demonstrates:

- Creating a working fire evacuation plan
- Strategies to avoid being trapped by a fire
- Fire drills; conducting your own

GS-6 VHS

Confined Space Entry- The Final Reg. – 19:31

Thorough 1910.146 required training covers roles and responsibilities of entry supervisors, attendants, entrants and:

- Creating/handling permits, identifying permit spaces
- Types of hazards and safety equipment
- Entry situations and emergencies

GS-7 VHS

Safety Bite- Hearing Conservation – 5:50

- Three-part hearing conservation program; testing, training, and protection
- Various types of ear protection

GS-8 VHS

Safety Bites-Safe Lifting – 5:00

- Backache causes; inflammations, injuries, aging of spinal disks
- How the back works, including diagrams
- The "lever principal" of lifting
- Lifting in non-ideal situations

GS-9 VHS

Forklift Safety- The OSHA Regulations – 18:00

This video will assist in complying with all OSHA regulations that apply to forklifts, mostly found in 1920.178:

- Personal protective equipment
- Fuel and battery safety; safe loading and stacking
- Safety around trucks, railroad cars
- Vehicle training and operation
- Safety platform requirements

GS-11 VHS

Forklift Safety Training Program – 21:00 (J.J. Keller)

- The lift truck: Pre-shift Inspections; Center of gravity; Steering & Maneuvering
- Hazards caused by the workplace; floor surface
- General Safety Rules: Load handling; areas of operation; battery re-charging; refueling

GS-12 VHS

OSHA Record Keeping and Insurance Paperwork

- Determining record ability
- Paperwork requirements

GS-13 VHS

What is Carelessness? – 4:15

Safety Orientation, awareness

GS-14 VHS

How to Develop a Safety Program – 5:55

Brief information on the development of a Safety Program

GS-15 VHS

Portable Ladders –12:00

Ladder safety.

GS-16 VHS

Safety Showers & Eye Washes – 8:00

Safety Showers: correct use, Eye Wash: correct use and treatments.

GS-17 VHS

Welding Safety – 13:30

Excellent tool complies with 1910.251-.255 training requirements. Includes safe work practices, hazards and appropriate PPE, fire safety and hazardous atmospheres, other hazards: Electricity, compressed gas cylinders.

GS-18 VHS

Human Behavior- Reducing Unsafe Acts- 10:50

Motivate employees to follow rules and procedures, exercise good judgment and associate the potential hazards of the job. Save money in injury costs and increase productivity.

GS-19 VHS

Eye Safety – JJ Keller 10:00

Reduce accidents & renew commitment to safety with this informative program. Features three 2 minute segments, each taking a different approach to eye safety. Covers how routine procedures turn into serious accidents. Provides employees with a valuable “wake up call”.

GS-20 VHS

Hazardous Materials Emergency Response – 30:30

Introduction to problems with Hazardous Materials Emergencies and examples of Hazmat incidents. Describes what to do in the event of a Hazmat incident and reviews the critical questions that must be answered before actions are taken.

GS-22 VHS

Propane Safety Update- 10:41

Train employees to safely use and handle this liquefied petroleum gas. Covers refilling tanks and cylinders, proper PPE:

- Properties of propane and escape hazards.
- Approved, unmanaged transport of cylinders.
- Protective wear for refilling.

GS-23 VHS

Slips, Trips & Falls – 11:00

Increase awareness of common hazards and the physical forces behind slips & falls:

- What to do if you or a coworker falls
- Body balance: eyes, inner ear & muscles
- Avoiding hazards: wet & oily surfaces, ice, poor visibility, stairway, and ladder & storage hazards.
- Physics of falling: Friction /momentum/gravity

GS-24 VHS

Hand and Arm Protection – 10:59

GS-25 VHS

Eye Protection – 11:00

GS-26 VHS

Fall Protection – 12:20

GS-27 VHS

Head Protection – 9:58

GS-30 VHS

Steps for Safe Lifting & Carrying

GS-33 VHS

Handling & Storing of Compressed Gas Cylinders – 6:13

GS-35 VHS

Human Behavior – Reducing Unsafe Acts – 5:56

Ag-Specific:

AG-1 VHS and DVD

Commitment to Safety – 13:00

Describes the changing grain industry and commitment to safety.

AG-3 VHS and DVD

For the Rest of Your Life

This video discusses the effects of Anhydrous Ammonia and the handling and usage of Anhydrous Ammonia. Most of the video emphasizes the effects of the product on the human eyes.

AG-6 DVD

Inside the Cotton Gin

AG-9 VHS and DVD

Electrical Wiring for Livestock and Poultry Structures

AG-10 VHS and DVD

Treatment of Cotton Gin Injuries

This film describes the first aid of hand injuries caused by cotton gins and specifically treatment for mangled hands.

AG-11 VHS and DVD

Endless Belt Manlift Safety – 13:00

A video taped slide presentation for the proper, safe use of an endless belt type manlift.

AG-12 VHS and DVD

Preventing Dryer Fires –14:00

Describes the causes and prevention of dryer fires. Emphasizing negligence and cleanliness of feed.

AG-13 VHS and DVD

Building, Covering and Moving Modules – 13:00

Outlines the procedures to build, protect, and move cotton-picking modules. An overview of safety procedures in the use and maintenance of cotton modules.

AG-14 VHS and DVD

Ground Water and Agricultural Chemicals- Understanding the Issues – 17:00

AG-15 VHS and DVD

Environmental Safeguards in Commercial Fertilizer Operations –21:00

A discussion of agricultural chemicals and the potential for environmental impact along with proper handling and storage of fertilizers.

AG-16 VHS and DVD

Safe When the Pressure is On – 15:00

Safety video emphasizing the precautions needed when storing, using and handling anhydrous ammonia. It also describes the effects of anhydrous ammonia in the human body.

AG-17 VHS and DVD

Deadly Dust – 26:00

This video discusses the effects of grain dust and the causes and measures, which can be taken to help prevent dust explosions.

AG-18 VHS and DVD

Livestock Handling and Transportation – 17:30

This video reviews the proper handling and transportation of cattle. Helps with understanding the basic principles of cattle behavior. Discusses livestock handling, facility design, and transportation.

AG-19 VHS and DVD

Bin and Tank Defects

This is a video taped slide presentation showing the integrity and problems with bins and tanks.

AG-21 DVD

Fire and Explosion Protection for Dust Collection

AG-23.3 DVD
Electrical Motors

AG-23.4 DVD
Oil Dust Control

AG-24 DVD
Manlift Safety, Hazard Communication, There are Choices, John's Story

AG-25 DVD
Cotton Gin Safety and Cotton Gins

AG-27 DVD
Your Safety Matters-
General safety for grain related facilities produced by GEAPS and NFGA.

Spanish-

SP-1 DVD

Welding Safety – 13:30

An excellent tool to comply with 1910.251-.255 training requirements. Includes safe work practices, Hazards and appropriate PPE, fire safety and hazardous atmospheres, other hazards: Electricity, compressed gas cylinders.

SP-2 DVD

Human Behavior- Reducing Unsafe Acts- 10:50

Motivate employees to follow rules and procedures, exercise good judgment and associate the potential hazards of the job. Save money in injury costs and increase productivity.

SP-3 DVD

Slips, Trips & Falls – 11:00

Increase awareness of common hazards and the physical forces behind slips & falls:

- What to do if you or a coworker falls
- Body balance: eyes, inner ear & muscles
- Avoiding hazards: wet & oily surfaces, ice, poor visibility, and stairway, ladder, and storage hazards.
- Physics of falling: Friction /momentum/gravity

SP-4 DVD

Accident Causes and Prevention – 10:45

SP-5 DVD

Eye Care & Safety – 12:00

SP-6 DVD

Personal Protective Equipment –
